

BREAKTHROUGH 2023: CELEBRATING INTERDISCIPLINARY EXCELLENCE OF ADHIYAMAN PUBLIC SCHOOL!

A spectacular exhibition featuring breakthroughs in art and science was inaugurated by renowned scientists from ISRO Bangalore Mr B Krishnam Prasad and Mr V V Ramana Reddy on 4 February 2023, at Adhiyaman Public School, Uthangarai. Dr S Thirumalmurugan, the chairman, Dr Shobha Thirumalmurugan, the secretary and Mr Ganapathiraman, the administrative officer of Adhiyaman Group of Institutions and the principal Mrs Leena Jose, graced the opening ceremony along with the students and parents.

The exhibition featured a dazzling display of artwork, experiments, games and puzzles by the students of the school. Every student put in enthusiastic effort to make the exhibition a huge success with their outstanding performances.

The show-stoppers of the event were the models depicting the latest research in robotics, special effects, engineering and the innovation such as AI based robot, automatic street lights, home automated system, web based smart agriculture, Wi-Fi car, smart city, drone, and human anatomy. A great variety of art and craft pieces were also on display ranging from painting and drawing to pottery and jewelry.

The excitement in the air was palpable and everyone got engaged in the fascinating activities presented in the exhibition. The exhibition was highly successful and was remembered for its various innovative and interactive activities that encouraged creativity and exploration in the different fields of art, science, maths, and languages. All the visitors expressed their elation and appreciated the exhibited works.

On the occasion of the exhibition held in the school, a function was organised wherein the distinguished scientist Mr Krishnam Prasad addressed the students and spoke about the importance of being attentive in the class, developing observation skills and applying the knowledge they acquire in real life.

During the function, both the scientists shared with the students their personal experiences and how their due diligence and hard work gave them success. Mr Ramana Reddy emphasised on the importance of making best out of the available resources and using all the information they get to understand the concepts and applying it in everyday life.

He, then interacted with the students, giving them ample opportunities to ask questions and clarify their doubts. This interaction was very fruitful as the students were keen in knowing the stories of their journeys. He

also asked them to make use of libraries and other available resources to gain knowledge and sought to inculcate the habit of reading books among the students.

The session concluded with a special message from the scientists to stay true to their commitment and passion towards the studies. The honourable guests wished the students all the best for their future endeavours. The function was a great success and it will certainly serve to benefit the students in a number of ways.
